

## Project Profile

### Lang Lang WRP Borehole Water Supply

**Client:** South East Water

**Value:** \$646K

**Completion Date:** November 2021

**Scope:** South East Water operates a Water Recycling Plant (WRP) at Lang Lang. Part of this facility is a membrane plant providing Class A water to local customers. Due to commissioning issues with the Class A plant, South East Water commissioned Jonoco to install an extraction and delivery system of groundwater from its Southern Rural Water approved ground water bore located on site. The works comprised digging a bore hole, installing a borehole pump, 100KI Header tank, delivery pump system and associated pipework.

**Achievements / Outcomes:** Project delivered on time and on budget, allowing SEW to supplement its reuse water supply and satisfy its customer consumption.
