

Project Profile

Yarra Valley Water Hypochlorite Dosing Plant Upgrades

Client: Yarra Valley Water

Value: \$1.02M

Completion Date: Ongoing

Scope: Upgrade/refurbishment of fourteen hypochlorite dosing plants comprising:

- Removal of the existing ABB PLCs and Secomea Site Manager units (used for remote control by a third-party Contractor who operate the chlorinators on YVW's behalf).
- Installation of a new Brodersen RTUs, Garderos modems and Fernhill HMI solution.
- Installation of new ProMinent Post Dose Chlorine Analysers

- Part supply and full installation of a new pre-dose chlorine analyser system in new free standing cubicle (at specified sites only). Includes installation of associated sample and return lines.
- Ancillary works,

Achievements / Outcomes: Use of appropriately skilled Jonoco technicians to ensure minimal downtime on the operation of the plants.
